

Call for Proposals

Consultant for End of Project Evaluation of the Building Soils and Communities Project

Light for the World is looking for a qualified consultant to undertake an end of project evaluation of the Building Soils and Communities Project implemented by Bethany Society from 2021 to 2023 in Meghalaya, India. The project is focussed on inclusive economic empowerment through integrated natural farming techniques.

The objectives of the proposed evaluation are to identify and document the achievements, relevance, effectiveness, efficiency, outcomes and sustainability of the project interventions and to identify best practices with the potential to be replicated or scaled up.

The purpose of this call for proposals is to contract a consultant to develop the evaluation design and tools in collaboration with Light for the World's Programme Coordinator and Disability Inclusion Consultant and thereafter conduct the data collection & analysis and develop the final report and case studies.

Overview of scope of work and timeline:

Phase	Time span	Comments
01 - Kick-off and inception	October 2023	Includes overall project plan and general TOR development
02- Setting up research design and coordination	November 2023	Includes advertising and hiring local enumerators if required
03 - Document review	November 2023	
04 - Development of tools	December 2023	
05 - Data collection	8-19th January 2024	
06 - Data compilation and analysis and substantiation	January 2024	
07 - Preliminary report	9 th February 2024	
08 - Presentation, final report, case studies	29 th February 2024	

Proposals must be sent to sigrid.baldinger@light-for-the-world by 25th September 2023.
